based resources

WE MAKE FURNITURE BETTER!

RAMS Industries offers innovations, quality, and service from stock to local woodworkers

We offer expertly matched Edgebanding to leading TFM/HPL companies as well as complimenting 3D Edgebanding designs.

Meeting the current trend for an invisible glue line, RAMS Industries offers unfilled and PUR hotmelts in addition to FusionEdge®, an Edgebanding that comes with color-matched glue already applied for Hotair, Infrared, and Laser Edgebanders from BIESSE, HOLZ-HER, HOMAG, and IMA.

Anticipating a growing demand for green products, the organization offers BioEdge® from BioPlastic Solutions. Our Edgebandings are Greenguard-certified meeting the highest standards for indoor air quality in residential and LEED projects.
