About Us

RAMS Industries is the leading distributor specializing in the Sales and Marketing of thermoplastic Edgebanding, PUR and EVA Hotmelt Adhesives, and related products to the woodworking industry.

We partner with leading manufacturers to bring woodworkers the latest innovations from stock.

With over 20 years experience in the North American woodworking industry, RAMS Industry offers expertise and experience to select the right Edgebanding and Hotmelt product for any customer application.

Product Range

Perfectly-matched colors to leading board manufacturers including color, textures, gloss, and woodgrain structure. Consistent color from lot to lot as we liaise with only one partner per product category.

FusionEdge® is the perfect solution for Hotair, Laser, and Infrared applications with color-matched, pre-applied glue for an invisible glue line.

3D Edgebanding enhances the design of any high-gloss cabinet door providing a three-dimensional look.

All our products are Gold Greenguard certified meeting the highest standards of indoor air quality perfectly suited for design specifications in LEED-certified buildings.

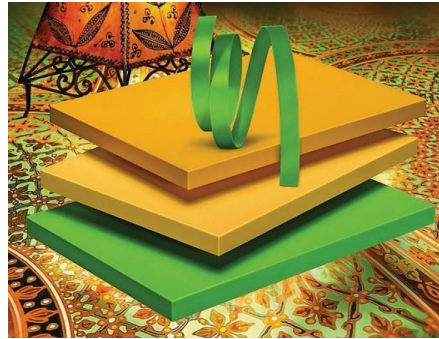

Product Range

BioEdge® is the only plant-based Edgebanding available in North America. It is made from PolyLactic Acid (PLA), which is often used in food handling and medical implants. After discarding BioEdge, the product is biodegradable which reduces waste in landfills.

Digitally-printed Edgebanding that perfectly match even the most detailed surface print patterns.

We offer the full range of Jowat high-quality Hotmelt Adhesives. Filled hotmelts for a durable and strong bond, unfilled hotmelts for an invisible glue line, PUR hotmelts that offer a permanent bond while sealing the edge against water and heat, all available in granular and cartridges.
